

## Freezing Keller's Apple Cider Donuts

Do you still have Keller's apple cider donuts at home? Then freeze them to enjoy later in the year and also for use in our yummy recipes. Our donuts taste great on cold, winter mornings!

### Freezing:

- If you can, keep them in the original plastic shell packaging.
- Place them in a sealable plastic bag – even better if you can double bag the donuts to reduce the risk of freezer burn.

### Reheating:

- Remove donuts from the plastic shell.
- Place on a microwave-safe plate.
- Microwave on HIGH (*Since microwaves can vary, please check donuts throughout the reheating process*).
  - For one donut, microwave for 7 to 10 seconds.
  - For 1/2 dozen, microwave for 1 minute and 15 seconds.
  - For one dozen, microwave for 2 minutes and 30 seconds.
